Mr. John N. Sampson
4148 Wycliff Drive
Winston-Salem, North Carolina 27106

Dear Mr. Sampson:

This letter confirms your reception of WPEH-AM on Tuesday, October 5, 1971 from 6:00 AM to 6:03 AM EDT.

It is very interesting that our AM signal was of a good signal strength in Winston-Salem.

The equipment here is mostly Gates. This includes both transmitters, all line audio equipment, the air console, and cart machines and turntables. Reel to reel tape machines are by Ampex.

The AM antenna is a vertical radiator 200 feet tall, and the FM antenna is a four bay circular polarization unit located on the side of the tower near the top.

Thank you for your letter.

Sincerely,

Sheldon Daitch
