Dear Mr. Sampson:

This is to verify that it was indeed WPUB radio which you monitored at 1130 kHz on Wednesday, December 23, 1970, from 7:15 am to 7:28 am EST.

WPUB is a day-time station operating with 1,000 watts of non-directional power with studios and offices in downtown Camden, South Carolina, and transmitter and tall tower located on Maroney Hill here in Camden.

I regret that we have no coverage maps available for distribution at the present time. We appreciate your detailed reception report and thanks for your interest in our station.

Sincerely,

C. A. Bowers
