

July 6th, 1970

Steve Sprague
413 E. 9th Street
Coffeyville, Kansas, 67337

Dear Steve,

Sorry this answer is so delayed.
Received by your reception report June 13th and it
is correct on programming details.
As you may or may not know we are 1000 watts daytime
and 500 watts pre-sunrise and normally put a pretty
good signal into Coffeyville, Kans.

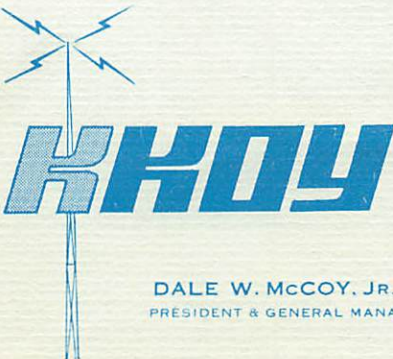

Incidentally, I worked at KGGF in late 1959 and early
1960 as a disc jockey. Those days are going fast and
I think I will soon be doing engineering alone.

Thanks for the reception report. Enclosed find a
copy of our latest coverage map.

Sincerely,

Al Diller
