Dear Mr. Sprague:

This is to acknowledge your reception of KFSB Radio on November 18, 1970.

Our station consists of a 5,000 watt day, 1,000 watt night operation using a two tower directional antenna system during the day and a three tower directional antenna array during the evening. Our transmitter and studio is located some two miles north and two miles west of the city on Dogwood Road. We use a 5 BC Gates 5 KW transmitter.

I am enclosing a coverage map of our day pattern. Nice hearing from you. If you should happen to be in Joplin stop in and look our operation over.

Sincerely yours,

RADIO STATION KFSB
