The Voice of Tulsa

50,000 watts

KRMG, **The Voice of Tulsa**, uses a six-tower array arranged in the form of a parallelogram. The columns bear 350° true and have adjacent towers spaced 720 feet (195°). The rows bear 35° true and have towers spaced 956 feet (259°). The transmitter site is located 17 miles west of Tulsa. The buildings house main and standby 50,000-watt transmitters.

To Steve Sprague

Confirming Reception

On 1/26/82 Thanks for listening
to KRMG and for the report.
