This is to confirm your reception of WLAC Radio, Nashville, Tennessee on 3-27-82 at 9p-9:12p from Coffeyville, KS.

WLAC operates on a frequency of 1510 KHZ with a power of 50,000 Watts, 24 hours per day, seven (7) days a week. WLAC uses a 5/8 wave tower, daytime, for non-directional. Night-time antenna is two 1/4 wave mono-tubes along with the 5/8 wave in a dog leg configuration. The pattern is a Cardioid with the main lobe to the South and a minor lobe to the North. Protection is afforded to WITS, Boston, Massachusetts (Class II) and KGA, Spokane, Washington (1-B). WLAC uses a Continental 317C-1 50 Kilowatt transmitter.

The WLAC transmitter is located 9.5 miles North of downtown Nashville. Studios are located at 10 Music Circle East, Nashville, TN 37203.

Thank you for your interest in WLAC.

Regards,

Watt Hairston
