

April 12, 1972

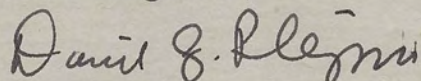

Dear Mr. Wesolowski:

Thanks for your report of reception of KALO on April 9, 1972. At this time, KALO was operating at 1000 watts non-directional for our monthly frequency test.

We normally operate at 500 watts, directional after sundown.

Your report is accurate and enclosed is some station literature.

Best Regards,

David J. Philipps
Chief Engineer

Mr. Ernest J. Wesolowski
