Dear Sir:

We Gladly verify your reception of our signal on Monday December 10, 1973, from 445AM to 5AM CST sending 1000 cycle test tone and station ID. We were running 1000 watts 60% modulation on the tone our Antenna is a 5/8th wavelength, 440 ft high. This gives us a theoretical gain of 3 dbs. We also verify your Feb. 2, 1963 reception on 1470 Khz. We were on at that time with the same equipment. The station manager Tom Nichols recalls this.

By the way I am an old Nebraskan myself. I was born in Columbus over fifty years ago and lived in Omaha in the late thirties. I was in the US Signal Corps at Fort Omaha. I even went to the U of Nebr for a couple of years.
