SUBJECT Frequency check

Thanks for your letter regarding the reception of our test signal on Monday April 4, 1977. This was our regular monthly frequency check which we run with the 1KW transmitter and a Tucson engineer monitors and gives us a report.

It is on the ^{Air} about 15 minutes in all, usually in three segments but the dates vary a little each month. We make 3 tests during this time. The tests would have been completed at approximately 12:16 MST as you noted.

New rate cards and coverage maps are being printed, we will send you some when we get them. Thanks very much for your interest.

SIGNED

Sincerely, Russ Walker, KAWT Radio Douglas
