 Omaha 7, Nebraska

Dear Earnest;

That was me making the freq test. I went on about 12.05 and off about the time you mentioned. I didn't notice what I was playing but I made the test myself and that was definitely my break. I am 1 kw with an old W E Xmtr that will pass 20,000 cycles with a minus 3 db loss. However my console will not do so well. My Freq monitor is near K C mo
