1416 Pasadena Avenue
Omaha 7, Nebraska

Dear Sir:

This will verify your reception report of our sign-off between 4:58 and 5:00 P.M. M.S.T. on January 1. Our coverage map is enclosed.

Our transmitter is on the east edge of Loveland...at 1440 East Sixth Street...our studios at 308 E. 5th...in the center of the business district. The tower is 150 feet high...on top of a 5-foot pedestal. Ground system includes in excess of 120 radials...a design feature which we feel accounts for our excellent coverage with only 250 watts.

I believe that we did verify a report from Mr. Stone, although we do not have a copy of it. I seem to remember looking for Stouffville, Ontario, on the map when the report came in.

Good luck in your DX activities, and thanks for your report.

Sincerely,

William H. Green
President

WHG:s

*P.S. We still have Mr. Stone's report
which is OK.
W.H.G.*
