

Dec. 30, 1971

Dear Ernest:

Thank you for your Repton report, it's nice to know how far out we can get, I'm sure you know that K.N.A.B. is 1000 Watt Day timer. We use a Lites BC1C 1000 watt transmitter and 406 foot tower which help our coverage. 1140 is a clear channel frequency with a Class B operation -

This letter will serve as a verification. If you are around here again please feel free to stop by -
