

Dear Sir,

Thank you so much for your DX report on reception
on July 27, 1973 at 8:13 - 8:30 PM.

We are always pleased to receive DX reports and this
letter is to confirm your report as correct.

KQXI is 10,000 watts using a Gates LOP transmitter
feeding a 200 ft. non-directional tower.

Arvada is a community of 50,000 people, located
on the Northwest edge of Denver, our transmitter
is located in Englewood which is about 14 airline
miles from the studio and operated by remote control.

Thank you again for your report and may you have lots
of good DXing.

Sincerely,

Lloyd Allen,
Chief Engineer
