

W-GTO

Radio•Florida — Cypress Gardens

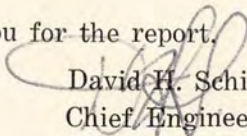

540 KC • 50,000 WATTS • CYPRESS 3-4103

Dear Mr. Ernest J. Wesolowski, 3/26/62, 19.....

This is to verify your reception of W-GTO

in Omaha, Nebraska on 3/23/62 at 6:30 AM EST.

Thank you for the report.

David H. Schick
Chief Engineer

Please Note

WGTO has four towers and the transmitter site is located 3 miles N. of Lake Alfred, Fla. We usually try to answer reports but will let them pile up over a period of time and I will admit some do get lost in the process. I find that quite a few reports are incomplete and some are pure cases of mistaken identity. These I do not have time to answer since it would require a letter with an explanation. We recently had these post cards printed and hope to reply quicker in the future.
