Re: Reception
Report # 73-61-T

Dear Ernie:

We ran our frequency test on 12 April 1973 beginning at 0300 hrs and stayed on the air at 1K for about 16 minutes at which time we reduced our power to 250 watts. We were using a dial tone and I'm sure you heard us at 1K.

I have enclosed a Coverage Map -

Boone Raynor, Engineer
