Vidalia, Georgia

Dear Ernest,

This letter is to thank you for your correct report of reception of our stations signals on March 6, 1967.

The time period 4:54 AM to 4:59 AM EST and your report is correct.

I am very sorry that the former engineer did not see fit to reply to your report but all reports are now being answered.

I am a Radio Amateur myself and know the value of a QSL.

I could not find any station letterheads and thought it would be OK to use some of our continuity paper.

WVOP is 21 years old and uses Collins equipment with a 21E transmitter. Our antenna is a single 252' non directional tower.

Your letter was much appreciated and we hope to hear from you again.

73 and DX,

Mike Dorworth, WA4KRU
Chief Engineer
WVOP

P.S. I have enclosed one of our coverage maps.
