

RADIO STATION K A S I
KASI Radio Center
Ames, Iowa 50010

January 22, 1967

To: Ernest Kesslowski

This will verify your reception report # 66-35 of KASI during a special DX test conducted December 12, 1966, between 0315-0400 C. S. T.

For your information KASI is a daytime facility licensed to 1430 kHz with an operating power of 1000 watts, non-directional.

May I take this opportunity of thanking you for allowing KASI to participate in the special test. Your technical remarks were most informative and interesting.

If we at KASI can be of any service in the future to the gentlemen of the IRCA and the NRC, please let me know.

Cordially,

Bruce Michaels
Bruce Michaels, (W9AKX/Ø)
Program Director and
Chief Engineer
