Ernest J. Wesolowski
Omaha, Nebraska

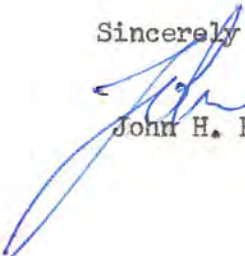

Dear Ernest:

Thank you for your response to our recent test. We're happy to do it any time because it keeps our all-night FM operator awake.

We vacated 910 in September of 77. The transmitters and antenna are: Sparta 710B main, RCA BTA-10H aux and BTA-1R ps and kw. The tower is a tall (290') quarter with an extensive ground plane. Our plans include an east-west DA night at 1000 watts, the ap is all filed. All audio and control are by STL, no wirelines. Audio processing is the new Inovonics 231 MAP 2 multibander.

Watch for KYET, 1450 in Payette to change frequency and addpower soon. Thanks again for your report and for writing.

Sincerely yours,

John H. Runkle, jr
