

*The World's Most Beautiful Music*

820 ON THE DIAL / 5,000 WATTS

January 1, 1962

Dear Sir:

Many thanks for taking the time to let us know that our signal is getting as far as Omaha. Even tho' we do not have a commercial market in that area, it is nice to know that we are getting out.

Our studios are located as indicated above and our transmitter is located about 25 miles west of Chicago just north of Elmhurst, Illinois. We have a single tower, 420' high, overall, and are still using a Western Electric 5C transmitter.

Your time and date, December 23, 1961 from 5:04 to 5:09 P.M. are correct for the program material indicated so you can assume that it was WAIT that you were receiving.

Again, many thanks for writing,

Sincerely

Harry Berg  
Chief Engineer
