Dear Sir:

Thank you for your reception report of WGEM on Tuesday, March 10, 1959. Please accept my apology for not getting this verification out to you sooner.

WGEM Radio operates on 1000 Watts Day and Night. There are four towers arranged in a parrallelogram, all four are used an night, only two in the daytime. The pattern is essentially non-directional in day, the night pattern having major lobes south west and northwest.

We hope this answers your questions.

Very truly yours,

Frank E. Laughlin
