

WKID

URBANA-CHAMPAIGN, ILLINOIS

TELEPHONE 367-5431

17 July 1963

Mr. Ernest J. Wesolowski
1416 Pasadena Ave
Omaha 7, Nebraska

Dear Mr. Wesolowski:

I am quite happy to be able to verify that on Saturday, 13 July 1963, you received WKID radio while the station was performing a frequency check. Our checks are monitored out of Kansas City, Missouri and on this particular check we were .7 of a cycle high from our assigned frequency of 1580 kc.

At the moment we are out of coverage maps, but our studios and transmitter are located at the east edge of the Urbana city limits on what is known as the Philo road.

All of our transmitting equipment is of GATES manufacture. Our antenna is a single, vertical, guyed tower 304 feet tall.

We are always interested in hearing from DXers and we are adding your letter to the many we have received at different times from almost everywhere in the United States except from the west coast.

Sincerely,

George F. Scharf
Chief Engineer

P.S. Sorry, didn't notice until now that I left out that the time of the check was 0015 to 0030 CST on 13 July.
