

Dear Sir:

Thank you for your recent reception report. It has been checked and found to be correct.

WVON operates on 1390KHZ, 24 hours a day, with a power of 5000 watts. Separate day and night directional antenna patterns are utilized, each employing four towers. WVON uses a Harris Corporation MW-5A pulse duration modulation transmitter.

Globe Broadcasting Company, owners of WVON, also operates WGCI-FM in Chicago. WGCI transmits on 107.5MHZ with an effective radiated power of 33,000 watts.

Additionally Globe owns and operates WDEE in Detroit, Michigan, WMGC in Cleveland, Ohio, and WDOK-FM, also in Cleveland.

Again, thank you for your interest in WVON.

Sincerely,

Jack Layton
Engineering Manager
