KCNW 1380

Dear Sir:

We at KCNW/ KUDL are pleased to confirm your reception of our station

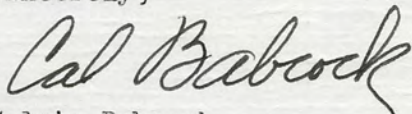

March 14, 1977 at 2:26 AM as described in your correspondence
dated March 1977.

KCNW operates with 5000 watts directional output during the day, and
500 watts directional at night. Our transmitter is a Gates BC-5P-2. The
antenna system is a five tower in line array.

Our FM effective radiated power output is 100 KW horizontal and 100 KW
vertical. The transmitter is a Gates FM 20 H3 along with a 10 bay antenna.
The center of radiation is 1156 AMSL.

Thank you for your reception report and good listening in the future.

Sincerely,

Calvin Babcock
Chief Engineer
KCNW/KUDL
