WEST SIXTH AT GARFIELD P. O. BOX 789 913-238-3165 JUNCTION CITY, KANSAS 66441

November 15, 1973

Dear Ernest,

Consider this letter as a QSL for your reception of KJCK on a frequency of 1420 KHz from 5:09 PM to 5:15:30 PM CST on the 11th of November, 1973.

The reason that you have not received a report on your previous reception is that Mr. Preston is no longer with us.

Thank you very much for your report and comments. I cannot include a coverage map as we do not have one made up at this time. I am including a copy of our weekly music survey put out by our FM affiliate, KJCK-FM. KJCK-FM recently received a license to operate at 100 KW ERP, full stereo. We have also made some changes in our antenna and would appreciate any possible signal report.

If you are a HAM as well as a SWL, I'll be available on 40 Meters during the early evening hours for a QSO to answer any questions you may have. My call is WB9AIU/Ø.

Tnx es 73's,

Lee Yazell
