Dear Sir,

This is your letter of verification that on April 25, 1963 between the times of 7:04 pm to 7:15 pm that you picked up station KRSL in Russell, Kansas. Studios and transmitter are located in the north part of the city and for a 250 watt station we have a very smooth coverage area. I received a DX letter last week from somewhere in northeast Canada and this of course was quite a shock.

The first of every month we have our frequency checked.

On the 25th we were deviating six cycles high.

thank you for your letter.

sincerely,
Bill Hanrahan
