Mr. Ernest J Wesolowski
1416 Pasadena Avenue
Omaha 7, Nebraska

Dear Mr. Wesolowski:

This letter will acknowledge your receipt of KSCB's Frequency Check conducted over the time period 12:50 AM-105 AM.

The information supplied in your reception report seems to check favorably with our log.

As to your other questions, perhaps a note to KLIB would produce results as to their time of Frequency measurement. KSCB's studio and transmitter are located approximately 2 miles east of Liberal proper, we are 1000 watts Non-Da day, and 500 watt DA night. Our tower array consists of 3 towers bearing 40 degrees east. We feed center tower at all times, but at night divide power to feed end antennas. Our towers at present are 208 overall.

I wish to take this opportunity of thanking you for writing.

Sincerely,

Alvin Peters
Chief Engineer
