Dear Ernest:

I was very pleased to receive your letter. We were on the air May 14 at 1:05 a.m. to test the transmitter after it had been repaired. I am pleased to be able to confirm your report. We do not have a coverage map as such, however, our tower height is 200 ft. and at the time you were listening, our power level was 1000 watts.

I am ^{amateur} ~~an~~ radio extra class and an avid short wave listener. I would be interested in some information about the International Radio Club of America that you belong to.

Again, thank you for your report.

Sincerely,

KWBW RADIO
