Mr. Ernest J. Wesolowski
1416 Pasadena Avenue
Omaha 7, Nebraska

Dear Mr. Wesolowski:

Thank you very much for your report of reception of WHAS on March 15, 1959.

In answer to your question, our antenna is a vertical 654 foot high tower approximately .6 wave length. We operate daily from 5:00 A.M. until Midnight. Between shortly after Midnight and warm up time before 5:00 A.M. we are normally off, except for occasional nights when tone tests are required.

Sincerely yours,

O. W. Towner

Director of Engineering
