August 7, 1973

Mr. Earnest J. Wesolowski
1416 Pasadena Avenue
Omaha, Nebraska 68107

Dear Mr. Wesolowski:

We are pleased to confirm your reception report of August 2, 1973. WKCB Radio is located in eastern Kentucky in mountainous terrain. Our technical facilities are: 1540 Khz, 1,000 Watts, (CH 500), from local sunrise to sunset, non-directional. Our tower is 404 feet, guyed, and our transmitter is a Gates BC-1G, and how we ever got that far was the very words our secretary used when she opened your letter. KXEL throws a fair signal at night in our area.

Again, we were glad to get your reception response on our station's frequency test.

Sincerely,

Steve Blair

General Manager.
