Ernest J. Wesolowski
1416 Pasadena Avenue
Omaha, Nebraska 68107

Dear Mr. Wesolowski:

We are very happy to write back to you concerning your recent letter. I am very sorry however, that the head engineer could not take enough time out from his duties to write, so may I introduce myself? I am the program director, Marty Theriot, & I also take an interest in these types of Radio clubs.

I am happy that you received our frequency test on the morning of February 5, 1973. That was the correct day and date. I must say that it was surprising that you would receive us so well.

I am also sending you a coverage map of our station. Oh yes, let me mention also that we were also on frequency, 900 kcs.

Very truly,

Marty Theriot
