Hello there!

Thank you for your report on hearing our station frequency check which was February 15 at 12:00 Central Standard Time.

Your information is correct, according to our transmitter log. Our frequency checks are heard monthly at approximately the same time.

Our transmitter is a Bauer Model #707 which delivers 1000 watts into a 72-ohm load at 1530 KC. The antenna is a 186' vertical tower which is slightly longer than 1/4 wave at our operating frequency. The ground system consists of 120 equally spaced copper radials 165' long plus a 50' by 50' copper ground screen. The geographical coordinates of our tower are 31° 34' 30.6" North Latitude and 93° 29' 46.4" West Longitude.

Enclosed is one of our KWLA coverage maps. Again, we thank you for your interest in our station, and we will always be interested in hearing your reports on same.

Cordially I remain,

James A. Bingaman
Sales Manager
