Dear Mr. Wesolowski:-

Received your report of reception letter this morning. Thank you very much. The report is complete and hereby verified.

WCRM conducts its regularly scheduled frequency check with a Detroit Michigan firm every 3rd. Monday of the Month, from 2 to 2:30 Am. EST.

Our Studios and transmitter are located about $1\frac{1}{2}$ mile south of Clare on Old U.S. #27, about a quarter of a mile from the new U.S.#27 Expressway. Our towers (2), are under a quarter wave in height, 180 feet. We have had similar reports like yours regarding the fine signal. Our ground condition is excellent here. That's what I blame it on. We do put out about the equivalent of a kilowatt in your direction. That helps too.

I am enclosing a coverage map of this Station, which will show you how directional we are.

Thanks for the report.

Sincerely,

Norbert C. Poepelman
Ch. Engr. Manager
