ROBERT PRO...ENGINEER
RADIO STATION KBUN
BEMIDJI, MINNESOTA

MR. WESOLOOWSKI

I was pleased to hear from you concerning the verification of KBUN's freq. check as of July## II, and I want to thank you for the letter, I had a little trouble with my time zoning but we got that straighten out in short order.

You were correct in your reception report of KBUN's freq. report. Our studio is located in business district of Bemidji and the transmitter is located one mile west of BEMIDJI right next to Lake Irvin. We are on remote set-up, our main transmitter is a Raytheon, a Gates Sta Level, a Gates standby transmitter, and a non directional tower, height about one hundred and fifty seven feet.

We applied for C.P. to increase from 250 to 1000 watts, should make it in September or October. I am sending you KBUN's Coverage Map. Thanks again for the letter

Very truly your,

Mr. Bob Pro...ENGINEER
