April 16, 1975

Ernest J. Wesolowski
1416 Pasadena Avenue
Omaha, Nebraska 68107

Dear Mr Wesolowski,

I am pleased to confirm your reception of Station K V B R on Monday morning, April 14th, 1975 between 2:27 am and 2:59 am CDT. Our transmitter was running at 1000 watts for the test on 1340 KHz. Our antenna is a single quarter wave tower and our .5 mv coverage extends about 20 miles from Brainerd in all directions during the day.

Thanks for participating in the test. Mabe we can do it again in a year or so.

Sincerely,

A handwritten signature in blue ink that reads "Mark W. Persons".

Mark W. Persons
Chief Engineer
Station K V B R
