WADENA, MINNESOTA

April 22, 1964

Mr. Ernest J. Wesolowski
1416 Pasadena Ave.
Omaha 7, Neb. 68107

Dear Mr. Wesolowski

This is to acknowledge your letter of April 17, 1964. The information you logged was correct, as verified by out logs.

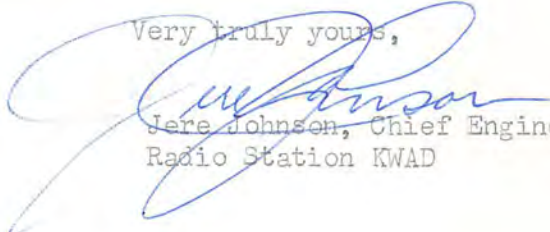

Radio Station KWAD operates on the frequency of 920 Kcs. We are directional after sunset. The hours of broadcasting are from 6:00 am till 11:00 pm.

We do not have an official coverage map but I am enclosing a map that is used for advertising our station.

Our antenna system uses two towers spaced 90 degrees apart giving us a signal at night that is pointed toward 15 degrees North true. The towers are 265 feet high setting in a swamp. We use a modified Gates transmitter feeding a 1000 watts to the antennas.

Wishing you many happy hours of DXing and good hunting. 73's.

Very truly yours,

Jere Johnson, Chief Engineer
Radio Station KWAD
