Dear Sir:

Thank you very much for your report on reception of KCMO. We have checked your report against our official program log and find it entirely correct.

KCMO operates on a round the clock basis. During the daylight hours our power is 50,000 watts in a non-directional pattern. During nighttime we use 10,000 watts into an array. Our pattern at night is in the shape of a propeller blade and the signal goes mostly north and south.

Sincerely,

Karl Troeglen
Technical Director
