Mr. Ernest J. Wesolowski  
1416 Pasadena Avenue  
Omaha, Nebraska

Dear Mr. Wesolowski:

This will acknowledge your reception of our station on November 9, 1971, between 5:26 to 5:42 PM. Your logging was complete and accurate. We do not have a coverage map available at the present time, but beginning at local sunset time, we go into a figure eight pattern with the strong lobes extending to the north and south.

That was a nice picture you enclosed and it looks like you have a pretty fancy setup there. Thanks for listening.

Very truly yours,

*Kenneth Hargis*

Kenneth Hargis, Chief Engineer
