Mr. Ernest J. Wesolowski  
1416 Pasadena Avenue  
Omaha, Nebraska

Dear Mr. Wesolowski:

This is to confirm your D-X report on KWPM, March 4, 1974. We were happy to cooperate with the NNRC in the test and are glad you were able to log us. The most distant reception report on this test was Mr. Thomas R. Sundstrom, Willingboro, New Jersey.

I do appreciate those kind comments regarding my feeble code efforts on our "time-tone" oscillator push button in the console.

We no longer use coverage maps, but inasmuch as some of you have requested one, I am enclosing an old one with the data at least ten years out of date. Our FM is now at 77 Kw & and V, programmed separately from AM.

Normally, we program C & W from 5:00 AM until 2:00 PM, when we spin plenty of Porter Wagner hits; but our "night people" operators are all "rock bound."

If you're ever in the Heart of the Ozarks Country, we'll enjoy having you stop by.

Very truly yours,

Laurel R. Thompson  
Chief Engineer
