Dear Mr. Wesolowski:

This is to verify your reception of K G H L Radio Wed. 1 February 1961 at
 ^{AM} (0007 PM MST).

For your records, KGHL operates on a frequency of 790kc with a fulltime power of 5000 watts (DAN). KGHL has been on the air since June 1928, and an affiliate of the NBC Radio Network since November 1931. Our staff, including our television sister, KGHL-TV Channel 8, numbers an average 40 persons. KGHLradio maintains one of the highest self-supporting transmitting towers in the U.S.---558½ feet tall.

Thank you for your interest in reporting reception of KGHLradio. Hope we'll hear from you again. Should you ever be in this area please do us the honor of making yourself known to us. We'd be glad to meet you in person.

In answer to some of your questions, we have a simple two tower array. Our studios are downtown Billings, the transmitter 4 miles West. Yes, our frequency check is with Lee's Summitt, Missouri.

Cordially,
K G H L Radio

Donald M. Gay, pga dir
