Dec - 23 - 75

Mr. Wesolowski

Thank for the letter. - The Morning at Nov 26, 1975 when you monitored our station between 12:10 AM MST + 12:15 AM we were conducting our Monthly Frequency Measurement. At that time we were on 5000 watts. We have 500 watts P.S.A. - Our Frequency Measurement is done by Commercial Monitoring Service in he's Summit, Mo., which is near Kansas City

W.R.E. in Topeka, KANSAS even causes us some interference on our Southern Secondary in our 25M/um Area. We have 4 Gates MW-5 P.D.M. Xmitter, its one of only 5 in the Entire Northwest. Enclosed Info. on P.D.M. - Good Xmitter.

Merry Xmas

J. Michael Dorris
