From The Geographical Center of North America

August 7, 1972

Mr. Ernest J. Wesolowski
1416 Pasadena Avenue
Omaha, Nebraska 68107

Dear Mr. Wesolowski:

Thank you for your note of July 29, 1972. Yes, this was KGCA, with a regular freq. check. We do this every three months.... the monitoring company that we use is the Commercial Monitoring Co of Lee Summit Mo. There is a mistake in the information you have tho..... We have been on the air since August 1961. We are 1000 Watts Daytime.... 250 Watts Nighttime. The weather here that evening was about 60 degrees and Partly Cloudy. You might be interested to know that we were 3.0 Low in our report.

Sorry for the delay
