Dear Sir:

This verifies your reception report of 12:58 AM CST on November 24, 1962 of radio station KSJB. Your information checks favorably with our log for that day.

Our studios are right on main street in downtown Jamestown and our transmitter is located on highway 281 about 6 miles due south of the city. There we have a three tower directional array which operates directional all the time that we are on the air. The pattern forms a figure "8" with main lobes northeast and southwest as shown in map enclosed. I hope this will fulfill your hopes on information about our station and I wish you good luck in DX in the future.

Very sincerely yours,

Harvey G. Van Erem
Chief Engineer
