Dear Ern,

I confirm your report reception on the 13th of ^{October} ~~September~~, 1962 at 5:00 P.M. to 5:15 P.M. mountain standard time on a frequency of 690 kcs. You're listed programming was correct but we're sorry you didn't tune in sooner we think you would have liked it.

KEYR or KEY-Radio has been in operation since June first of 1962 . Equipment wise we have R.C.A. audio and transmitting equipment, Our tape recorders are Ampex 351's which are great for reproduction. You requested information about our towers, they're 288' above ground and 3,375' above sea level. The towers are made by stainless steel co. of America. Well thats the picture equipment wise.

Our programming consists of mostly good, happy, swinging type music. We have three full time announcer-DJ combination and two full time newsmen their names follow:

morning---- LLOYD OLIVER ann-DJ
 JACK GILBERT news
mid morn.-- JACK GILBERT ann-DJ
 BOB MARLAND news
afternoon-- yours truly ROG BARTLETT ann-DJ
 BOB MARLAND news
 JACK GILBERT news
 LLOYD OLIVER news

program di.-- LLOYD OLIVER
news di.----- BOB MARLAND
manager----- JACK GILBERT
chief eng.--- yours truly ROG BARTLETT

Well thats about the size of it here hope I answered all of your questions. By the way we don't make frequency checks at night, they're made during the day. We make or I make a proof of performance a month. (after 12) Enclosed is the old KTCI letterhead.

If you should be in this area some time drop in and say hello. Keep up the good hobby see you real soon!

Yours truly,

Roger Bartlett
chief engineer
