1416 Pasadena Ave.

SUBJECT Verification of reception

Omaha, Nebraska 68107

I am pleased to verify your report of reception of our test transmission performed during frequency measurement at 0015 to 0030 MDT on Saturday July 15, 1972. Our transmitter is a Collins 820D-1, and at the time of your report we were operating with 1000 Watts output, though normal programming is done after sunset on 250 watts. Thanks for your report, our first from that direction.
