Mr Ernest T. Wesolowski  
1416 Pasadena Avenue  
Omaha, Nebraska

Dear Mr Wesolowski:

This letter is in regard to your reception report of Wednesday,  
March 29, 1972.

After consulting our Program Director and program log I find your  
report to be accurate and I apologize for the delay in confirmation.

KICA operates on a frequency of 980 KHZ at fulltime power of 1 KW  
from the hours of 5:30 AM untill 12:00 PM. Our antenna array consists of  
two 250 foot towers, with only one tower loaded for daytime non-directional  
operation. During nighttime operation both towers are loaded transmitting  
a signal in a figure 8 pattern to the NNW and SSE. Thank you.

*William Merryman*
