Ernest J. Wesolowski
1416 Pasadena Avenue
Omaha, Nebraska 68107

Dear Ernest:

Thank you for your report of reception on October 2nd. Unfortunately I cannot confirm your reception as you report a Ford dealer spot at 1:19AM and we did not run any Ford dealer spots after midnight. The remainder of your report however sounds as if you did actually hear KRZY.

As you are probably aware, 1450 is a local channel with a large number of stations all operating with 250 watts nondirectional at night. This makes DX reports rather difficult. However we are working on a power increase and move to 1090 KHz, and hope to make the move within the next year or two.

Cordially,

KRZY RADIO

Guy Smith
Chief Engineer
