Omaha, Nebraska 68107

Sir,

Your report of reception is appreciated. Verification of reported reception is made to 10:15pm on 26 July 1973 in that KGWA program log shows U.S. Savings Bonds Public Announcement, News, Weather (confirmed by Vance AFB) and musical jingle. The station does not sign off at 10:15pm.

KGWA is a 1kw directional (four tie) array with lobes propagated southeast, southwest and northwest. Propagation in your direction is maintained at only 10 to 11 mv/m at 2 miles from the antennas so it is surprising that ionospheric conditions produced capability of reception.

No specific after hours operation exists. Thank you for your interest. We apologize for the delay. We have been moving to a new studio and the Chief Engineer is hospitalized.

Cordially,

  
Raymond L. Miller  
Engineer
