

Thank you for your recent reception report. We have checked it against our program log and found it to be correct.

CKPT Radio first went on the air December 2, 1959 with a daytime power of 1000 watts. In May 1967 CKPT was granted an increase to 5000 watts day and night, with 4 towers, located about 3 miles from our downtown Peterborough studios.

We broadcast continually 24 hours a day, 7 days a week with a contemporary middle-of-the-road format and rock music 6pm. - midnight nightly.

We are a member of the Canadian Contemporary News System providing listeners with top national news coverage.

I am enclosing a coverage map, so you may note our geographical location. Also enclosed is a copy of our record survey "The PT Parade".

Thanks once again and continued success.

EC/mr

Edwin Crompton,
CHIEF ENGINEER.
