

Sir.

We were on the Air Oct 12 1962
for our frequency Test, As for typing
you verification I can't type. If Mr.
Stone received typed verification
someone other than me sent it

We have a 1000 watt DA-N station
Remote Daytime with one engineer so
I am very busy, but had a few min. to
spare so I am use it as you can see

We have two antennas 200'
high. Our studios are in the heart of
town on South Second St. Xmitter 1.5 miles
out of town on the L'burg Highway

Ave you and Engineer at K000,
If so do you have good and alot of
equipment. We have much equipment as
of the stations in Mid-Tenn. with the
exception of WLAC & WSM Nashville.
I sorry that I had to use this type
but it is all I have

Don Jones
Chief Eng.
