Omaha, Nebraska 68107

Dear Ernest:

This is to confirm your reception report (Number-77-37) of this station on April 12, 1977.

Presently WTNN runs 500 watts into a 118 ft. tower, with a Gates BC-1H transmitter. We have, however applied for a power increase to 1KW and tower height of 160 ft., so maybe the next time you hear us we will be stronger.

Best of DX,

David C. Church
